GOLDMAN SACHS ENGINEERING - 2024 SUMMER INTERNSHIP BIRMINGHAM

ABOUT GOLDMAN SACHS

At Goldman Sachs, we connect people, capital and ideas to help solve problems for our clients. We are a leading global financial services firm providing investment banking, securities and investment management services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals.

Goldman Sachs is a world leader in developing quantitative and technological solutions to complex business problems. Working side by side with the firm's trading, sales and investment management professionals, our quantitative and technical professionals use their training to create financial products, advise clients on transactions, measure risk and identify market opportunities

JOB RESPONSIBILITIES

We are looking for a Summer Intern to join us in June 2024 for 10 weeks. You will have the opportunity to leverage the global platform of Goldman Sachs Engineering while working in one of our newest office locations.

Candidates would be required to work on a wide range of problems, including the designing and developing sophisticated software and systems using proprietary as well as modern web, mobile, and, desktop technologies to:

- Manage, visualize, and analyze massive sets of market and operational data used in our trading risk management, and control functions
- Correctly and efficiently route orders for billions of dollars of securities every day
- Allow the ability to represent, transact in and risk manage all of the firm's OTC derivative positions
- Help the team optimise and automate work streams and create new apps/market screeners/model functionality including via programmatic toolkits
- Distribute computations across tens of thousands of computers
- Contribute to key open source initiatives – e.g. GSCollections, Project Panama

SKILLS AND QUALIFICATIONS

- Communication & Interpersonal Skills
- Strong Sense of Teamwork
- Commitment to Excellence
- Leadership
- Intellectual Curiosity, Passion and Self-Motivation
- Integrity, Ethical Standards and Sound Judgment
- Desire to build upon technical skills (programming languages, run-time systems, databases)
